

Frequently used GCP Cmds

Authentication & Configuration

List authenticated accounts

gcloud auth list

Login

gcloud auth login

Login with a service account

gcloud auth activate-service-account --key-file=key.json

View active configuration

gcloud config list

View current project

gcloud config get-value project

Set project

gcloud config set project PROJECT_ID

List all projects

gcloud projects list

List configurations

gcloud config configurations list

Create a new configuration

gcloud config configurations create CONFIG_NAME

Switch configuration

gcloud config configurations activate CONFIG_NAME

Compute Engine (VMs)

List VM instances

gcloud compute instances list

Describe a VM

gcloud compute instances describe INSTANCE_NAME --zone=ZONE

Start a VM

gcloud compute instances start INSTANCE_NAME --zone=ZONE

Frequently used GCP Cmds

Stop a VM

```
gcloud compute instances stop INSTANCE_NAME --zone=ZONE
```

Restart a VM

```
gcloud compute instances reset INSTANCE_NAME --zone=ZONE
```

Delete a VM

```
gcloud compute instances delete INSTANCE_NAME --zone=ZONE
```

Create a VM

```
gcloud compute instances create INSTANCE_NAME --zone=ZONE
```

SSH into Linux VM

```
gcloud compute ssh INSTANCE_NAME --zone=ZONE
```

RDP password reset (Windows)

```
gcloud compute reset-windows-password INSTANCE_NAME --zone=ZONE  
--user=USERNAME
```

View serial console output

```
gcloud compute instances get-serial-port-output INSTANCE_NAME --zone=ZONE
```

Disks

List disks

```
gcloud compute disks list
```

Describe disk

```
gcloud compute disks describe DISK_NAME --zone=ZONE
```

Create disk

```
gcloud compute disks create DISK_NAME --size=100GB --zone=ZONE
```

Snapshot disk

```
gcloud compute disks snapshot DISK_NAME --snapshot-names=SNAPSHOT_NAME
```

Images

List images

```
gcloud compute images list
```

Describe image

Frequently used GCP Cmds

gcloud compute images describe IMAGE_NAME

Networking

List VPCs

gcloud compute networks list

List subnetworks

gcloud compute networks subnets list

List firewall rules

gcloud compute firewall-rules list

Create firewall rule

gcloud compute firewall-rules create allow-http \
--allow=tcp:80

Delete firewall rule

gcloud compute firewall-rules delete RULE_NAME

Kubernetes (GKE)

List clusters

gcloud container clusters list

Get cluster credentials

gcloud container clusters get-credentials CLUSTER_NAME --region=REGION

Create cluster

gcloud container clusters create CLUSTER_NAME

Delete cluster

gcloud container clusters delete CLUSTER_NAME

Cloud Storage

List buckets

gcloud storage buckets list

Create bucket

gcloud storage buckets create gs://BUCKET_NAME

Frequently used GCP Cmds

List bucket contents

```
gcloud storage ls gs://BUCKET_NAME
```

Upload file

```
gcloud storage cp file.txt gs://BUCKET_NAME
```

Download file

```
gcloud storage cp gs://BUCKET_NAME/file.txt .
```

Delete object

```
gcloud storage rm gs://BUCKET_NAME/file.txt
```

IAM

List service accounts

```
gcloud iam service-accounts list
```

Create service account

```
gcloud iam service-accounts create ACCOUNT_NAME
```

List IAM policy

```
gcloud projects get-iam-policy PROJECT_ID
```

Add IAM role

```
gcloud projects add-iam-policy-binding PROJECT_ID \
  --member=user:user@example.com \
  --role=roles/viewer
```

Cloud SQL

List SQL instances

```
gcloud sql instances list
```

Describe SQL instance

```
gcloud sql instances describe INSTANCE_NAME
```

Start SQL instance

```
gcloud sql instances patch INSTANCE_NAME --activation-policy=ALWAYS
```

Stop SQL instance

```
gcloud sql instances patch INSTANCE_NAME --activation-policy=NEVER
```

Frequently used GCP Cmds

Logging

Read logs

gcloud logging read

Read latest VM logs

gcloud logging read "resource.type=gce_instance"

Read latest 10 logs

gcloud logging read --limit=10

Monitoring

List notification channels

gcloud alpha monitoring channels list

List alert policies

gcloud alpha monitoring policies list

Cloud Run

List services

gcloud run services list

Deploy service

gcloud run deploy SERVICE_NAME

Delete service

gcloud run services delete SERVICE_NAME

Artifact Registry

List repositories

gcloud artifacts repositories list

List Docker images

gcloud artifacts docker images list LOCATION-docker.pkg.dev/PROJECT/REPOSITORY

Frequently used GCP Cmds

Cloud Build

Submit build

gcloud builds submit

List builds

gcloud builds list

View build logs

gcloud builds log BUILD_ID

Useful Information

List available regions

gcloud compute regions list

List available zones

gcloud compute zones list

Show account, project, region, zone

gcloud config list

Show current account

gcloud config get-value account

Show current region

gcloud config get-value compute/region

Show current zone

gcloud config get-value compute/zone

Show current SDK version

gcloud version

Update Cloud SDK

gcloud components update

Troubleshooting

Enable an API

gcloud services enable compute.googleapis.com

Frequently used GCP Cmds

List enabled APIs

gcloud services list

List all APIs

gcloud services list --available

Check quota

gcloud compute project-info describe

Get help

gcloud help

Get help for a specific command

gcloud compute instances create --help
